

Treehouse Newsletter Signup

You are to create a webpage that allows a user to sign up for our monthly newsletter. A form on the webpage will allow users to enter their name and their email address.

Please adhere to the guidelines below:

- Create a form class with a constructor that accepts the following parameters.
 - form method
 - form action
- Provide a method to enable or disable JavaScript form validation.
- Provide a method that outputs the form to the page after a form object has been instantiated.
 - validation if enabled
 - name field
 - email field
 - submit button
- Write submissions to a table.
- Create a page that lists all submissions.
 - ordered by date (descending)

Please send back code and table schema.
